

## UNJUSTIFIABLE (*JUSTICE FOR MALES*)

ARCHANA

This article explores the everyday remaking of patriarchy justice. There is a word for every gender remarkable as female / woman in both the cases if we see there is a need of man word without it there is no proper meaning to the existence of the word female / woman.

Whether it is elderly victimisation? Whether it is child victimisation? Whether it is woman victimisation? Whether it is man victimisation?

Where is the puzzle, from which person is really getting victimised from other person?

Who is really the problem creator or who is really getting hit no one gets the question because this is blindfolded way which is believed the one who has the visible wounds are claimed to be the victim otherwise embarrassed person who doesn't have any identification of being victimized but left out blankly.

Everyone have their own perspective, some call some part as right in their view but that may not be right in another person's view.

Basic education provides all the possible ways to live for self but is it sustainable for live long??? Then that part would become a question mark.

Example 1

For example let me remind of some news a male candidate liked a female candidate but on knowing his attitude is not right she found another male candidate. In aggressive the first male candidate killed her by taking her to an isolated place.

Is this needed at this age are they clever enough to make their decisions to end up in a right way?

Is the value of education utilized by them for any self defence? If this existed in any way it could have saved both of their futures.

Let us take second next topic is about privacy but it has to be told out for another example

Example 2:

In a public passenger train a 12 passengers were killed among that seven ladies were women and rest were male. Also a family was killed within it.

For an argument ending up the life is tit for tat or tape on self.

*A case under section 302 (murder) and other relevant provisions of the Indian Penal Code (IPC) has been registered against all the accused.*

Raising hands is the only solution for the arguments made orally by speech.

Example 3:

This case is similar to case 2. But here a guy was said as a culprit by women. But forensic analysis stated that he didn't touch her.

What kind of impact these kinds of falsely complaint male candidates get. This kind of condition induces for raising example 4 kind of scenario all over.

Example 4:

A man cyber bullied many women for getting money and happiness. This man had very bad impact in his child hood days with the guardian bought up by him the available unknown resources said. Due to this many girls life got ruined and they were doubted by everyone for attitude issues.

Due to few persons are all men and all women are pushed up into violent decisions!

These are no time for scolding or see who is right or who is wrong!

Females may be first and all rounder in everything but when it comes to respect, she misses it for self everywhere at every part of life in some or the other way.

But she takes every initiative in positive aspect to live the life for others or for the sake of living.

When a girl is unable to live and comes out with an issue and then she gets rights this kind of scenario we have seen always but how many women remained silent we don't have the count or census to it.

Is it the wound within or externally we can never know until silent breaks off.

According to WHO data, the age standardized **suicide rate in India** is 16.4 per 100,000 for **women** (6th highest in the world) **and 25.8 for men** (ranking 22nd).

WHOSE MISTAKE IS IT?

*It's totally awkward situation woman loses self respect and that indeed makes other men self respect to go off which indeed happens with no interests of girls. Dream of one kind in a person but at last untoward incidents and consequences disturbs the lives making their future live in bloodshed.*

So same does for men. One good example is given below

#### Example 5:

A respectable man of the society due to language problem he asked something to women in the public place, she thought him to be flirting with her. She slapped him in front of everyone. His security guards were standing next to him in his protection, but due to one small minor issue it distracted and brought hatred against female in his mind. So whenever he happens to come across any female issues, he will burst at females in aggressiveness. This incident didn't only have impact in his outside environment but also affected personal life as well.

A small divergence sometimes leads to bigger loses in self and others future as well. No matter whenever he speaks out to anybody his colleagues and security guards located on the spot on that day might have made a wrong image on the person so same does for that woman.

I would like to say about few incidents that are very common and happens in everyone life at least once. But what he had learnt for our life till date it depends on the reactions that get reflected in the form of actions.

The one who sees our welfare that is self. We can't rely on men or women no matter who is it.

#### Example 6

A man silently approached a girl and proposed her one to ten times; she refused it ample number of times. It is obviously going to have a scary impact on girl. But when another guy came into her life, all other troubles started on her through that man and the guy whom she trusts doesn't trust her and doesn't want anyone to trust her.

This is one more very good example, as we have seen unstable partners/ couples who aren't able to take the decisions of their own and at last end up the future missing the very good opportunity that already existed.

Here culprit could be anyone whether male or female. We don't have to say further example for explaining it.

Another example similar kind is the example given below

#### Example 7

Two school children were studying together, one of the guys who are her classmates. Both went to a party with friends where both boy and the girl had special drinks. She fainted on the spot and the boy anxiety got stimulated and he misbehaved with her. All the friends who stood out planned and took video out of them. As a result of complications happened to the girl, as a result he was arrested and the boy promised to marry girl at a very young age. Both of their dreams collapsed.

But among their friends who did this mischief that didn't come into picture because he or she doesn't know who can be responsible cause for this happening as both blamed each other.

A glass may get broken into two pieces but even if it is joined with quick bond it has to get separated at some point of time after realization which is not the expectations of elders.

The recent Supreme Court ruling granting permanent commission to women on par with men will have a far-reaching impact in promoting gender justice. The court held, “An absolute bar on women seeking criteria or command appointments would not comport with the guarantee of equality under Article 14”.

Everything exists in the society still if a girl whether she is modern or traditional but when she walks by the road alone she is seen as an item instead of watching as a human. At the same time if a girl is walking with a man she is seen whether she is having a ring in her hand or whether she is having a chain in her neck or whether she is wearing ring in her leg in the same perspective to see her in the one and the same way.

If the guy is not married to her we know what kind of possibilities of negative thoughts gets inculcated in the minds of others, we can't explain what will happen to a girl.

Life is not a machine to take it in the way others prefer on a human.

Without the support of a male gender life of the girl is always at a risk whether it was yesterday, today or in future. No matter how many laws and amendments get raised but these status of positions will remain unchanged.

First and last but not the least, I conclude my article stating that if there is no justice for a women it means somewhere in the track men missed their justice.

Sex differences in academic strengths can't fully explain gendered future choices either of the genders. Taken together, although gender segregation is to some extent associated with individuals making choices matching their academic strengths, the vast discrepancies in outcomes between men and women can be only in part attributed to sex differences in their performances.

In a study carried out in the UK, Alex Linley and colleagues found that men

In a study carried out in UK, Alex Linley and colleagues found that men scored lower than women on interpersonal strengths (love, kindness and social Intelligence) and men scored higher than women on creativity.

Also in research carried out with Croatian students, Ingrid Brdar and her team found that the most characteristics In research carried out with Croatian students, Ingrid Brdar and her team found that the most characteristic strengths of women were integrity, kindness, love, gratitude, and fairness, while the most characteristic strengths of men were integrity, hope, humor, gratitude, and curiosity.

Also in Croatia, Miljković and Rijavec found sex differences in strengths in a sample of college students. They found that men scored higher in creativity, leadership, self-control, and zest, and women scored higher in kindness, love, fairness, and appreciation of beauty.

In Israel, Littman-Ovadia and Shiri Lavy found that women scored higher on Also In Israel, Littman Ovadia and Shiri Lavy found that women scored higher in love, appreciation of beauty, and gratitude while men scored higher on creativity.

In Spain, Ovejero and Cardenal found significant gender role differences for some of the character strengths: kindness, love, social intelligence, fairness, gratitude, appreciation of beauty, leadership, love of learning, forgiveness, creativity, and spirituality. They found that masculinity (gender roles associated with being male) negatively correlated with these character strengths, while femininity (gender roles associated with being female) was positively correlated with them.

One very interesting aspect of research on strengths and gender is that the relationship between strengths and life satisfaction may be different for men and women.

Overall if we throw the spot light on the men value, rights, voice and justice then automatically there will be a better place for all women in all respect.
