# A STUDY OF RECRUITMENT AND SELECTION AT GTC PLACEMENT SERVICES

Dr. YERRAGOLA PRAKASH Email Associate Professor NIMS University Rajasthan, Jaipur Manju Shekhawat Email: shekhawatmanju2002@gmail.com NIMC School of Business Studies NIMS University Rajasthan,Jaipur

# Abstract:-

I opted for this particular topic named "Recruitment & Selection"

Because recruitment and selection procedures havetaken a dramatic change in the industry. Human resource is respons ible for giving birth to human embalmers. The corefunction of an organization is Recruitment and Selection because t he organization doesn't want to be a bad recruiter by selecting manpower that might have the potential to spoil the long earned goodwill or corporate image and also incurheavy recruitment costs on them.

# Introduction:-

Recruitment refers to the process of attracting, screening, and selecting qualified people for a jobat an organization or firm. For some components of the recruitment process, mid- and large-size organizations often retain professional recruiters or outsource some of the process to recruitment agencies. It is the process to discover sources of manpower to meet the requirement of staffing schedule and to employ effective measures for attracting that man power in adequate numbers to facilitate effective selection of an efficient working force. The main objective of the recruitment processis to expedite the selection process.

Selection on the other hand, is the processo f picking individuals who have relevant qualifications to fill jobs in an organization. The purpose of selection is to pick up the most suitable candidate who would meet the requirements of the job in an organisation best, to find out which job applicant will be successful, if hired. To meet this goal, the company obtains and assesses information about the applicants in terms of age, qualifications, skills, experience, etc.then we'd of the job are matched with the profile in abdicated

# Literature review

1. <u>NGOVINET(2005)</u>: Checking candidates' information via referenceis an essential step in a recruitm ent process. However, many companies do not pay much attention to such an importantthing. Recruiters should check candidates' information like achievements, behavior in their previous companies. Recruiters can easily check such information by calling referees. The more important the position is, the more carefully they have to check the reference. In any circumstances, recruiters should highly appreciate and focus on the reference check.

- 2. <u>RynesSL(1999)</u>:- The use of technology in employee selection process highly developed rather than in recruitment or placement; and therefore, the major focus is always on selection. Not that recruitment or placement is any less important function; On the contrary an organization's success in recruiting defines the no of applicants with which it will work towards selection. It becomes more challenging if not easier. However the prevalent practices and restrictions place more and more emphasis on the section process.RynesSL 1999
- 3. EndahSetTiwari(2016): The results showed that formation submission has not been based on the analysis on the needs of employees, as well as job and workload analysis. There are three factors inhibiting the application of the merit system in the recruitment and selection of employees. The first is the administrative barriers related to the lack of harmonization between the policy framework which became the legal basis for carrying out recruitment and selection of employees. The results showed indications of corruption in the process of recruitment and selection of employees. Results also indicate that the practice of transaction between applicants and committee still happens. EndahSetTiwari(2016)
- 4. <u>Maidment J (2003):</u>The study suggests the kind of training & exposure that the students require for dealing with the workplace stress, It also emphasizes on the role pf pedagogical interventions that are required to help the students who feel the pressure of placement because of their low financial conditions. The study was conducted on special 39 Victorian Social work students.(Maidment J (2003)
- 5. <u>Iwasaki T (2005):</u>The study also tries to understand the impact of MBA intervention on the other job related criterion such as employability skills, Job satisfaction, confidence in Knowledge, career growth etc. The interest in the research for the Author has stemmed up from the fact that in spite of regular & continuous criticism regarding the ability & competency of the Management institutions to prepare thestudents for a successful career, the institutes are attracting students worldwide.

# **RESEARCH OBJECTIVES:**-

- 1. alyzing the current recruitment and selection processes
- 2. Identifying strengths and weaknesses in recruitment and selection methods

# Research design:-

Research is a norganized and systematic way off inding answers to questions.

SYSTEMATIC because there is a definite set of procedures and steps which you will follow. There are certain things in the research process which are always done in order to get the most accurate results.

ORGANIZED because there is a structure or method in going about the research. It is a planned procedure, not a spontaneous one. It is focused and limited to a specific scope.

FINDING ANSWERS is the end of all research. Whether it is the answer to a hypothesis or even simple question, research is successful when we find answers. Sometimes the answer is no, butitis still an answer.

# <u>Sample design:-</u> For this research project sample were collected from Jaipur city <u>Sample size:-</u> The sample size target for the research project is 24.

# Sample media:-

A structured questionnaire is used to connect the respondents.

#### Tools used for analysis:-

With the aid of several tools, including tabulation and figures, the data was analyzed.

# **TYPES OF DATA COLLECTION:-**

For purpose of data collection, the following sources were used

#### Primary data:

The primary data will be collected through a set of self-designed questionnaires filled by the sample population.

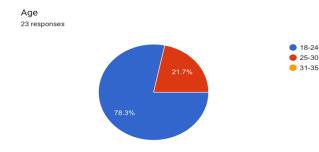

#### Secondary data:

The secondary data will be collected from: - Books. Journal and magazines.

# **Data Analysis and Interpretation**

| Response | Frequency | Percentage |
|----------|-----------|------------|
| 18-24    | 15        | 75%        |
| 25-30    | 5         | 25%        |
| 31-35    | 0         | 0%         |
| Total    | 20        | 100%       |

#### Data analysis

From the above graph and table, it is observed that out of 20 responses, 15respondent is from 18 -24 age group with 75%, 5respondents are from 25-30 age group with 25%.

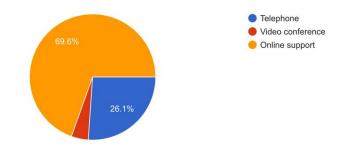

#### Interpretation

It is observed that most of the respondents are in the age group of 18-24 Years and the least number of respondents belong to the age group of 25-30 years and no respondents belong to 31-35 age group

#### 2. Technological support for recruitment?

| Response         | Frequency | Percentage |
|------------------|-----------|------------|
| Telephonic       | 6         | 27.03%     |
| Video conference | 1         | 4.50%      |
| Online support   | 15        | 68.20%     |
| Total            | 22        | 100%       |

Do you take any technological support for the process of recruiting ? <sup>23</sup> responses

#### Data Analysis

From the above graph and table, it is observed that out of 22responses,6respondents of for telephonic with 27.03%, 1 respondents for video conference with 4.50%, 15respondents for online support with 68.02%

nternational Journal of Scientific Research in Engineering and Management (IJSREM)Volume: 08 Issue: 06 | June - 2024SJIF Rating: 8.448ISSN: 2582-3930

### Interpretation

It has been observed that, there is a majority of people respond to online support system and lest to video conference system

# SUGGESTIONS & RECOMMENDATIONS

1) I wish to suggest that the lion share of the percentage of respondents who are agreeing to the internal recruitment denotes that they are satisfied with their jobs as internal recruitment provides them the opportunity of career growth. Companies should take care of those individuals who are supporting the external recruitment as external recruitment brings additional cost for the organization.

2) I wish to suggest that the lion share of the percentage of respondents who are agreeing to the transfer denotes that they are satisfied with the job as it provides them the opportunity to be placed in a better prospective area. Companies can take into consideration the option of inclusion the deceased employee's dependents as it would enhance the companies' reputation.

# Conclusion:-

As I have come to the end of my study I have had the following experiences while conductingthis study.

- It was a very enlightening experience for me as I got to learn many new things through this study.
- Various visits to the companies GTC Placement Services and ample interaction with the people has broaden my horizon and taught me as to how are the HR policies in such big organizations made.
