INTRODUCTION:

Job is one of the important elements of people's life. Their living style and their socially depend on their jobs. Therefore, every organization must have a satisfied workforce. Nowadays, the private sector plays a significant role in uplifting the economy of Pakistan. They are not only providing good services but are also providing job opportunities to a large group of people. Keeping in view the contribution of the private sector to society and the significant role of job satisfaction to improve the employees' performance, the present study aims to know the job satisfaction of employees and its relationship with the performance level.

There is a general understanding that the overall productivity and success of an organization depends on the effective and efficient performance of employees and that better performance

depends on employees' job satisfaction. For that purpose, researchers have identified various aspects of job satisfaction, its relative importance, and its relationship with performance and productivity.

Job satisfaction is the positive and negative feelings of an employee towards his job or it is the amount of happiness connected with the job. Therefore, job satisfaction is one of the most widely spread researched topics in the field of organizational psychology. According to Locke, job satisfaction is the positive and enjoyable feeling that results from the evaluation of one's job or job experience.

It is observed from the previous studies that when an employee is satisfied, he will perform at his level best to achieve the organizational objectives. Similarly, safety and good relationships with supervisors and co-workers are the biggest satisfiers nature of the job, way of supervision, job security, recognition, and advancement are important factors for employees' organizational commitment.

Likewise, participation of employees in pension, profit-sharing plans, and job security is positively correlated with job satisfaction, whereas many studies have recommended opportunity for professional development as the biggest determinant of job satisfaction.

and private sectors, greatly contributes to the overall growth of the nation. As far as the job satisfaction of doctors is concerned, Pakistan is facing various issues. Due to limited research in such an industry, the present study is intended to explore the satisfaction and performance level of medical doctors working in the private sector.

NEED OF THE STUDY:

Beyond there search literature and studies ,job satisfaction is also important in everyday life .As many studies suggest, employers benefit from satisfied employees as they are more likely to profit from lowers staff turn over and higher productivity if their employees experience a high level of job satisfaction.

RESEARCH METHODOLOGY

METHODOLOGY:

Research methods are the techniques and tools by which you research a subject or a topic .Research methodology involves the learning of various techniques to research and acquiring knowledge to perform tests, experiments, surveys, and critical analysis.

Research methodology simply refers to the practical "how" of any given piece of research. It's about how are searcher systematically design a study to ensure valid and reliable results that address the research aims and objectives.

RESEARCH INSTRUMENT:

A questionnaire was prepared to keep the objective in mind, the questions were structured and directed to make the respondent understand them easily. The respondent has to use a rating scale to answer some questions. The questionnaire includes open-ended and closed-ended questions.

DESCRIPTIVE RESEARCH:

Descriptive research design is called explanatory design. This describes the demo graphic characteristics of employers who are attending training programs. Descriptive studies are undertaken in many circumstances. When the researcher is interested in knowing the characteristics of certain groups such as age ,occupation, experience, etc., a descriptive study is necessary. Hence the researcher has chosen the descriptive research method for the study.

RESEARCH DESIGN:

The study was base don a survey method. The study aims to find the satisfaction levels of employees

PERIOD OF STUDY:

This study on employee satisfaction was conducted during 28 days.

SAMPLE SIZE:

The sample size of this study is 95 respondents.

STATISTICAL TOOLS:

- Percentage Analysis
- Cross tabs statistics

DATA REQUIREMENT:

PRIMARY DATA:

In the study ,primary data were collected through personnel interviews using a questionnaire. The questionnaire was administered to hundred employees of Sundaram Industries Pvt Ltd.

SECONDARY DATA:

Secondary data forth is study was collected. Previously publishes records, statistics, research reports, and documents. Periodicals and websites.

SAMPLE SIZE:

The sample size of this study is 95 respondents

SAMPLING DATA:

A sample design I sad definite plan for obtaining a sample from a given population.

The convenience sampling method was use din the selected.

QUESTIONNAIRE:

In this study, there searcher has used a questionnaire consisting of eight teen choice-based questions

GRAPHICAL REPRESENTATION OF DATA:

Graphical representation toolssuchas bargraphs and pie chartshav ebeen used for the data analysis.

PERCENTAGE ANALYSIS:

Percentage analysis refers to a special kind of ratio. % is used in making a comparison between two or more series of data, % issued to describe a relationship. It can be used to compare the relative terms and the distribution of two or more series of data.

$$\% \text{ of Respondents} = (\text{No. of respondents} / \text{Total}) * 100$$

- Growth and professional growth.

SUGGESTIONS:

- They have to conduct training programs regularly.
- Management should provide an opportunity to practice the learned in the workplace.
- Training program should also include the latest technology and current information.
- The trainee should make the employees to aware of the personal benefits he can achieve.
- Better performance through training.
- Training provided to employees on their requirements.

CONCLUSION:

The study was conducted to find out the link between job satisfaction and the performance of employees working in private organizations. While studying the relationship of job satisfaction with different variables such as qualification, gender, occupation, family system, and marital status, it is concluded that job satisfaction has no significant association with gender, qualification, family system, as well as marital status. It is determined from the study that job satisfaction is significantly correlated

With the occupation of employees. Hence, medical doctors are more satisfied with their jobs as compared to teachers and bankers. Further more ,it is also concluded from the aboveresultsthattheperformanceofsatisfiedemployeesissuperiorascomparedto dissatisfied employees.
