A Study on the Effectiveness of Staffing in E-Recruitment with Special Reference to Careernet Technologies

1Sivaranjani R M, 2Mrs. A.Santhyia, 1Student, 2Assistant Professor, 1Master of Business Administration, 1M. Kumarasamy College of Engineering, Karur,TamilNadu,India

Abstract: This research work titled “A study on the Effectiveness of Staffing in E-Recruitment with special reference to Careernet Technologies”, was done with the main objective to study on Factors influencing staffing process in E-recruitment and to know the candidates needs and preferences inorder to assess their satisfaction levels. To provide the suggestion for the organization in evaluation of the effectiveness in E-Recruitment in terms of time & cost efficiency comparison to staffing methods. It is descriptive research design. The Primary data has been used to collect data with the help of Questionnaire. The sample size is 120. Tools used in this study is Correlation and Chi square. The major findings are the majority 56.7% of the respondents enrolled that staffing helps to fill the vacant positio

Keywords: Factors Influencing Staffing process, E-Recruitment, Retention, Growth opportunities, Working environment, Candidate management, Employee engagement.

1.1 INTRODUCTION TO THE TOPIC

I. INTRODUCTION

The purpose of this paper is to give an overall assessment of effectiveness in E-recruitment process to recruit and select people at Careernet Technologies. Descriptive design is used in this report. Online recruitment is effective in terms of saving cost of recruitment and selection. Case exploration about the effectiveness of online recruitment depicts that it saves time to hire and reduces recruitment cost. Effectiveness of online recruitment process can be used by other firms working in different industries. Use of online recruitment and selection process offers advantage in the form of economies of scale. Therefore, this feature of e-recruiting would attract lot of corporations to invest their resources in developing e-recruiting supply chain. Only limited researchers have been conducted over the effectiveness of online recruitment and selection process. So, there is lot of scope to conduct further research over this growing phenomenon that is currently on the prime focus for the company.

II. OBJECTIVES OF THE STUDY

To identify whether Staffing through E-recruiting system is more effective. To analyze the level of quality in E-recruitment system.

To evaluate the effectiveness of E-recruitment in terms of time & cost efficiency comparison to staffing methods.

III. SCOPE OF THE STUDY

The main aim of this study is to know the Factors Influencing the Staffing process in E-Recruitment with special reference to Careernet Technologies.

IV. NEED FOR THE STUDY

The purpose of this study is to know the Factors Influencing the staffing process to influence of company management on their engagement, satisfaction of the candidate and their growth and development on candidate engagement in Careernet Technologies.
II. REVIEW OF LITERATURE

1. Nafia Sultanah, Nahida Sultanah (2018), at present organizations are becoming more online-dependent while dealing the human resource management activities. Today companies prefer online-recruitment media to attract and pick the best suit from a pool of potential candidates. Some advantages are ensured and some problems, too often faced by the organizations during depending on online recruitment. Addressing the effectiveness of online recruitment and generating the solutions for overcoming the current difficulties of online recruitment is key focus of our study. Some variables are identified to evaluate the usefulness of online recruitment to the recruiting organizations.

2. Chungyalpa and Karishma (2016), in today’s hyper competitive business environment employees are a source of competitive advantage. It is absolutely critical for businesses to hire the right people, with the right skills, right knowledge, right attributes, at the right time, for the right job. The recruitment and selection process has become one of the key processes determining the success of an organization. This paper examines the recruitment and selection process and the latest trends concerning recruitment and selection.

3. Bhupendra & Swathi (2015), now-a-days the traditional recruitment method has been revolutionized by the wave of Internet. E-Recruitment is the latest trend and it has been adopted by large & small-sized organizations. Significance of internet can be seen as searching for best suitable job is just a click away. Job portals, company websites and social networking all makes recruitment speed and helps in finding best match for vacant positions. E- recruitment is getting trendy among recruiters and job seekers because of its advantages like time, cost & quality etc.

4. A.Kumudha, Saranya Priyadarshini.C (2014) Recruitment has become an important process in the highly competitive labor market. The traditional methods of recruitment had been revolutionized by the emergence of the Internet. E-Recruitment is the latest trend in the recruitment process and it has been adopted in many organizations from large to small-sized companies. Many companies use e-Recruitment to post jobs and accept resumes on the Internet, and correspond with the applicants by email. The main success factors of e-Recruitment are the value-added services provided by the job sites, cost-effectiveness and speed, providing customized solutions, helping to establish relationships with HR managers and facilitate brand building of the companies.

5. Lakshmi (2015), E-Recruitment or online recruitment is the process of recruiting personnel with the use of technology and web based resources. The practice of e-recruitment has made the process more efficient and effective. With the help of e-recruitment the organizations can reach large number of workforce and can identify the skilled personnel easily.

III. RESEARCH METHODOLOGY/RESEARCH DESIGN

A research design is the plan or framework used to conduct a research study. It involves outlining the overall approach and methods that will be used to collect and analyze data to answer research questions or test hypotheses. This paper has employed a descriptive research method. This study aims to study effectiveness of the labour welfare measure on employee satisfaction.

METHOD OF DATA COLLECTION

This paper is solely based on the primary data. A well-structured questionnaire have been used to collect the data. The interview method was employed while the data was collected.

POPULATION

A population is a group of people, objects, or events that have specific characteristics and are of interest to the researcher and here employees and candidates of the company Careernet Technologies are taken as the population for this research.

SAMPLING UNIT

A sampling unit is a basic unit that is selected from a population. It is the unit about which information is collected and data are analyzed. The sampling unit will be with employees and candidates of Careernet Technologies.

SAMPLE SIZE

The Sample size is 120.

SAMPLING METHOD

The Simple Random sampling method was employed for the sampling of data collection.

TOOLS FOR DATA ANALYSIS/DESCRIPTIVE STATISTICS

This chapter deals with the descriptive and statistical analysis of the primary data collected from the employee who working in the organization. The hypotheses drawn by the researcher are confirmed with the support of statistical tools and results are inferred. Percentage analysis is a simple statistical instrument which is widely used in analysis and interpretation of primary data. It deals with the number of Respondents' reply to a questionnaire in percentage attained from the total population nominated for the study. It is one of the simple forms of analysis which helps the researcher to realize the outcome of the research.
**CORRELATION**

Correlation is a statistical measure that indicates the extent to which two or more variables fluctuate together. A positive correlation indicates the extent to which those variables increase or decrease in parallel, a negative correlation indicates the extent to which one variable increase as the other decreases.

**CHI-SQUARE**

Chi Square test oh homogeneity is used to determine if two or more independent sample vary by distribution on a single variable. A common use of this test is to compare two or more groups or conditions on a categorical result. Formulation of omnibus test statistic is formed as independence test and homogeneity test.

**SCALING METHOD**

The process of arriving at a set of statements to measure attitude, opinion, or perception is known as scaling. In this paper, the impact of the staffing process on the candidate satisfaction is analyzed using a questionnaire based on a five-point Likert scale.

**IV DATA ANALYSIS AND INTERPRETATION**

**DATA ANALYSIS**

Data analysis is a process of inspecting, cleaning, transforming and modelling data with the goal of discovering useful information, informing conclusions and supporting decision making. Data analysis has multiple facets and approaches, encompassing diverse techniques under a variety of names, and is used in different business, science, and social science domains. It provides a deeper understanding of processes, behaviors, and trends. It allows organizations to gain insights into customer preferences, market dynamics, and operational efficiency.

**4.1 DESCRIPTIVE STATISTICS**

**TABLE NO 4.1.1**

<table>
<thead>
<tr>
<th>Increases the reach of job postings to a wider pool of candidates</th>
<th>No. Of respondents</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Strongly Disagree</td>
<td>0</td>
<td>0%</td>
</tr>
<tr>
<td>Disagree</td>
<td>0</td>
<td>0%</td>
</tr>
<tr>
<td>Neutral</td>
<td>22</td>
<td>18.3%</td>
</tr>
<tr>
<td>Agree</td>
<td>71</td>
<td>59.2%</td>
</tr>
<tr>
<td>Strongly Agree</td>
<td>27</td>
<td>22.5%</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>120</strong></td>
<td><strong>100.0%</strong></td>
</tr>
</tbody>
</table>

**Inference**

From the above table 4.1.1 It was found that 59.2% responded staffing increases the reach of job postings to a wider pool of candidates, 22.5% responded that they strongly agree for the statement, 22% responded neutral response, 7.5% of the respondents disagree the statement, 0.8% of the respondents strongly disagree that no candidates are retained using staffing criteria.

**4.2 CORRELATION**

**4.2.1 HYPOTHESIS STATEMENT**

**H0** – There is no significant correlation between the Staffing increases the reach of job postings to a wider pool of candidates and Staffing in E-Recruitment system helps in reducing unvital recruitment costs.

**H1** – There is a significant correlation between the Staffing increases the reach of job postings to a wider pool of candidates and Staffing in E-Recruitment system helps in reducing unvital recruitment costs.
TABLE 4.2.1
Staffing increases the reach of job postings to a wider pool of candidates and Staffing in E-recruitment system helps in reducing unvital recruitment costs

<table>
<thead>
<tr>
<th></th>
<th>Pearson correlation</th>
<th>Sig. (2-tailed)</th>
<th>Staffing increases the reach of job postings to a wider pool of candidates</th>
<th>Staffing in E-recruitment system helps in reducing unvital recruitment costs</th>
</tr>
</thead>
<tbody>
<tr>
<td>Staffing increases the reach of job postings to a wider pool of candidates</td>
<td>1.000</td>
<td>0.518</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Staffing system streamlines the screening and shortlisting process inE-Recruitment</td>
<td>0.518</td>
<td>1.000</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Inference
From the correlation table 4.2.1, it can be seen that the correlation coefficient value is 0.518 which lies in the moderate correlation region. Since p-value (0.00) < 0.05, we accept the alternate hypothesis. It can be concluded that there is statistically significant correlation between Staffing increases the reach of job postings to a wider pool of candidates and Staffing in E-recruitment system helps in reducing unvital recruitment costs.

4.2.2 HYPOTHESIS STATEMENT
H0 – There is no statistical significant correlation between Staffing increases the reach of job postings to a wider pool of candidates and Staffing system streamlines the screening and shortlisting process in E-Recruitment.
H1 – There is a statistical significant correlation between Staffing increases the reach of job postings to a wider pool of candidates and Staffing system streamlines the screening and shortlisting process in E-Recruitment.

TABLE 4.2.2
Staffing increases the reach of job postings to a wider pool of candidates and Staffing system streamlines the screening and shortlisting process in E-Recruitment

<table>
<thead>
<tr>
<th></th>
<th>Pearson correlation</th>
<th>Sig. (2-tailed)</th>
<th>Staffing increases the reach of job postings to a wider pool of candidates</th>
<th>Staffing system streamlines the screening and shortlisting process in E-Recruitment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Staffing increases the reach of job postings to a wider pool of candidates</td>
<td>1.000</td>
<td>0.431</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Staffing system streamlines the screening and shortlisting process in E-Recruitment</td>
<td>0.431</td>
<td>1.000</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Inference
From the above correlation table 4.2.2, it can be seen that the correlation coefficient value is 0.431 which lies in the low correlation region. Since p-value (0.00) < 0.05, we accept the alternate hypothesis. It can be concluded that there is statistically significant correlation between Staffing increases the reach of job postings to a wider pool of candidates and Staffing system streamlines the screening and shortlisting process in E-Recruitment.
4.3 CHI-SQUARE

4.3.1 HYPOTHESIS STATEMENT
H0: There is no relationship between the Personnel and Candidates can be educated about the job opportunities only through staffing process.
H1: There is a relationship between the Personnel and Candidates can be educated about the job opportunities only through staffing process.

<table>
<thead>
<tr>
<th></th>
<th>Value</th>
<th>df</th>
<th>Asymptotic Sig. (2-tailed)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pearson Chi Square</td>
<td>17.18</td>
<td>3</td>
<td>.001</td>
</tr>
<tr>
<td>Likelihood Ratio</td>
<td>17.21</td>
<td>3</td>
<td>.001</td>
</tr>
<tr>
<td>Linear-by-Linear Association</td>
<td>12.86</td>
<td>1</td>
<td>.000</td>
</tr>
<tr>
<td>No. of valid cases</td>
<td>120</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Inference
From the above table no 4.3.1, it was found that the Pearson Chi-Square significant value is .001 which is less than 0.05. Hence Null hypothesis (H0) is rejected and Alternative hypothesis (H1) is accepted. Therefore, it is inferred that there is a significant relationship between the Personnel and Candidates can be educated about the job opportunities only through staffing process.

4.3.2 HYPOTHESIS STATEMENT
H0: There is no relationship between the Personnel and Staffing system streamlines the screening and shortlisting process in E-Recruitment.
H1: There is a relationship between the Personnel and Staffing system streamlines the screening and shortlisting process in E-Recruitment.

<table>
<thead>
<tr>
<th></th>
<th>Value</th>
<th>df</th>
<th>Asymptotic Sig.(2-tailed)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pearson Chi Square</td>
<td>12.14</td>
<td>4</td>
<td>.016</td>
</tr>
<tr>
<td>Likelihood Ratio</td>
<td>13.23</td>
<td>4</td>
<td>.010</td>
</tr>
<tr>
<td>Linear-by-Linear Association</td>
<td>.61</td>
<td>1</td>
<td>.433</td>
</tr>
<tr>
<td>No. of valid cases</td>
<td>120</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Inference
From the above table 4.3.2, it was found that the Pearson Chi-Square significant value is .016 which is less than 0.05. Hence Null hypothesis (H0) is rejected and Alternative hypothesis (H1) is accepted. Therefore, it is inferred that there is a significant relationship between the Personnel and Candidates can be educated about the job opportunities only through staffing process.

V FINDINGS
1. The majority of 50.8% staffing guides candidates while facing challenges
2. The majority of 49.2% responded that staffing is highly effective in quality hiring
3. The majority of 55% staffing is effective in managing large volume of applications
4. There is statistically significant correlation between Staffing increases the reach of job postings to a wider pool of candidates and Staffing system streamlines the screening and shortlisting process in E-Recruitment.
5. There is a significant relationship between the Personnel and Candidates can be educated about the job opportunities only through staffing process.
VI SUGGESTION

All the recruitment and selection activities are coordinated and controlled in such a manner that all demands are met. But still the questionnaire analysis gave some loopholes regarding the functions of the HR department. According to these loopholes following suggestions were put forth to the HR department.

1. Challenges can be nullified while engaging and guiding candidates.
2. Through staffing candidate retention rates can be achieved.
3. Organization should inculcate staffing and encourage employees to promote it to retain candidates and also to maintain their brand identity for their future scope.
4. The e-recruiting officials should undergo training in order to improve their communication skills.

VII CONCLUSION

Candidate Engagement is the buzz word term for employee communication. The study aimed the factors influencing on Staffing process and 120 samples were taken for the research. Data was collected through a self-administrated questionnaire across the employees and candidates of Careernet Technologies by simple random sampling method and it was found that employees are agree with the Staffing and Candidate Engagement factors handled by the company. Like Job seekers, man power consulting companies are spreading across the nation in millions. Huge giants organisations are outsourcing their requirements to these consulting firms which would make them to concentrate on their core business. This outsourcing technique some how reduces the chances of getting junk profiles. These firms are again seeking the help of job portals by hitting the same database. Even though E-recruitment process is having some cons, its pros are in peak level.
