Associate Professor of English, Paavai Engineering College, Namakkal, Tamilnadu, India.

Abstract

Youths are the period from childhood to adulthood and is the age of discovery and dreams have the power to transform the nation into a better place and they are the real innovators, creators, builders, asserts and leaders of any nation. They work for an identity in society, equality, Justice, homelessness, unemployment, exploitation, poverty and have to solve other social problems like dowry, human rights and gender issues. Youth have always more responsibilities towards their own country. The young people bring spanking new perspectives, technological adaptability, and energy; these are assets that can transform everything from one level to another in the national systems. Harnessing the unique qualities of youth march supporting, engaging and catalyzing and unleash positive change across social, economic, and political dimensions of every nation. This article accumulate the power of young citizens can strengthen the foundation of every nation and create sustainable pathways for growth and improvement and working for the excellence in the continuous innovative and brainstorming achievements with high esteems from the mentality of youth to adults with the combination of humanity flavor even in the acknowledgement of international level from brain to heart touched. The tastes of youth inspire the neighbor beyond the presence and recognize their cultivation in the accomplishment of the achievement of nation.

Key Words : Accumulate, brainstorming, equality, Justice, homelessness, unemployment, exploitation, poverty, accomplishment, excellence

The challenging nature of youth ought to be watered by the adults and the supporting body of every nation to harvest the extraordinary benefits and results of the powerful and inspiring power of youth. By kindling the insight of the youth through the knife of effective education definitely support the power of youth in the advancement of national development. Learning empowers the juvenile with the brainstorming ideas, skills, and moral and social values to be active in the field of social, economic, and political enhancements. Educated youth are the best choice for the development of national innovation societal challenges and build a comprehensive growth. They have good governance, driving social inclusion, peace, and economic growth by shaping new and innovative opportunities for themselves and global level.

Education is essential for the development of the betterment of every young minded people globally. Education is prior in eradicating intellectual poverty and hunger and in promoting continual, inclusive and

equitable growth in all respects. Tremendous excellence towards education utility, quality and affordability of using the power of youth are central to global development and competence. Despite significant improvements in increasing standard and quality of education must be ensured even from the primary school level. Moreover, such improvements have necessarily been followed by an equivalent transition to higher education, vocational training, informal education or entry into the work place, especially for girls and young women. Worldwide 10.6% of young people are illiterate, lack of basic skills such as reading and writing, and as such lack the means to be able to sustain a living through full and decent employment. By educating such people also make the nation strong powerful youth employment high levels worldwide.

There is a need of logical education policies, in the people-centric way, with national development priorities and needs, international development strategies and employment market ratios. Doing so will promote the intellectuality of young people, fight extreme educational poverty, and allow for a maximization of the benefits of education for youth. Knowledge of education and skills are key factors to the full and effective participation of youth in the processes of national development. Involvement of educated young people only ensures that they acquire the knowledge self realization and promotion of self and nation in all respect. Greater focus on universal access to quality education and empowerment of youth definitely ensure the fruit of education.

By promoting learning and life skills of young people and adults fulfils the thirst of the nation. The objective commits nations to ensure that the learning needs of all youth to met through equitable admittance to apposite learning and life skills commitments. The realization of all six goals improves the environment for youth to benefit from education. The 62nd session of the General Assembly in 2007, the significant responsibility of both formal and non-formal education in abolishing of educational poverty and other ethical development was recapped. It also emphasized the need of the basic education and training for eradicating illiteracy. The importance of commitment expanding of secondary and higher education, especially young women. The United Nations primarily concentrates on five key areas: promoting policy dialogue, monitoring progress, carrying out advocacy, developing capacities and mobilizing funding. To reach the aim of educating all people, the United Nations endorses edification through many channels, organizations and resources, together with through the United Nations Educational, Scientific and Cultural Organization (UNESCO), the United Nations Children's Fund (UNICEF), the United Nations Development Programme (UNDP), the United Nations Population Fund (UNFPA) and the World Bank. These supporting agencies are cooperative with the EFA association, which is led by UNESCO, and work together with governments and nongovernmental associations, and also research organizations and the private sector too.

Poor quality education is common among the educator societies, with education being poorly adapted to the cultural and linguistic contexts of many groups. Meager quality of education and training disallow young people learning, employment and improved quality of life. The poor quality of education jeopardy underpins dissimilarity and sustaining intellectual poverty and marginalization. Augmented efforts are needed to ensure that education at all level is respondent to the needs of young people and the realities romantic and scientific

in which they live, so as to adequately equip them for participation in social and economic life. Ensuring quality education, the development of the society and gender sensitive learning, safe and potential educational environments, including efforts to abolish harassment, and liberation of education in an impartial, gender sensitive and aggressive free manner are the basic education for all the citizens.

The utilization of policies and programmes by modern technology to increase the use of techniques in education ought to be strengthened and recognized for its importance in the provision and evaluation of education, as well as an invaluable skill for young people. Promoting Non Formal and Informal Education Many education and training systems do not provide young people with the basic skills needed to erase intellectual poverty and all kinds disability, even when they receive formal education. No formal education programmes fill this gap by providing learning and skills development opportunities that are germane to the young people's healthy life. Always provided through youth and community based organizations, non-formal education facilitates the learning of life-relevant knowledge and skills, especially for disadvantaged and marginalized groups. Non-formal education should not be a substitute to formal education, rather than complementariness in providing a more fully rounded and skills based approach, equipping youth competing demands of work and personal and social life. The awareness about the informal learning in different workplace should be increased. The utilization of informal education and learning is a huddle of educational responses to sharpen the participation in education and training for reasons of social addition and economic development. Many countries following new and innovative schemes of recognition of no formal and informal learning have been promoting. Combining classroom education with workplace training, and technical training with communication, problem solving and entrepreneurship awareness increase the usage of the power of the youth. Otherwise, young people will find it difficult to find their right job, to shine in employment, to move on in the workplace, and to succeed in learning for life. Hence, increasing employability requires consideration of both short- and long-term perspectives, enabling young people to seize immediate employment opportunities while also equipping them with the Youth and Education.

Ability to continue learning and adjust to right changes in the workplace and career opportunities are the basic discipline to the young mindedness. There is an urgent need of transform more youth to develop the skills they need for work and healthy life. At the same time, it emphasizes the requirement for broad partnerships which involves national development. In addition to preventing young people from plummeting from school, alternative learning opportunities that take into account the improvement of educational level of the youth. These reasons usually include income and intellectual poverty, gender, disability, family tragedy, social imbalance and conflict, and low market returns to education. The education food must be given to these young people appropriate opportunities to consolidate their basic awareness and competencies, and equip them with the relevant skills to shine in personal and public life.

The youth is valuable and dynamic resource of holding the brighter future of every nation. In a assorted and effervescent country like India, the sharp potentiality is immediate demand for the innovative and digital development. As the torchbearers of future, the youth play a key role in resolving issues and making

affirmative changes that can enrich the nation. Engaging in the democratic process and exercising the right to vote empowers the youth to have an assignment in shaping policies and electing leaders to drive the nation forward is immediate requirement of the youth. Implementation of innovation and entrepreneurship fosters economic and employment platform. Empowering the youth through valuable and practical education and skill programs empower them with the knowledge and expertise to take on management roles and contribute the development of the nation. Leveraging technology for intellectual and social improvement amplifies the impact of youth-led initiatives and facilitates the youth to reach a wider range of development of nation. Supporting critical issues and advocating for policy changes empowers the youth to develop agents in the nation's progress in various levels. The leaders who have made a positive impact inspire others to take on similar initiatives and contribute to the betterment of the country with energetic and renewable.

The youth of a nation are the architects of positive growth and challenges. Their enthusiasm, passion, and commitment to make different hold the prominent and brighter future of every nation where every young citizen can thrive and contribute to his nation's growth and development. The youth carries immense significance on his shoulder as a fundamental part of a country's innovative and potential growth. As future the young leaders shape their nation's trail, contributing to economic growth, collective development, and brighter expectations for the intact the world.

Today's youth live in the world of rapid technological advancement, economic transformation, and evolving social structures. These developments serve as opportunities to the youth to the youth-led movements addressing environmental change, educational reform, and social justice. The strong foundation of meaningful youth empowerment is the recognition of young people as valuable contributors. By recognizing their role and energies, we can adopt and deploy strengths-based approaches and acknowledge the unique capabilities, insights, and energy that youth can bring to the national challenges and making them resources to be developed and engaged in serious and innovative progresses where experienced adults guide and respect youth and they develop confidence in their abilities besides practical skills. Effective mentorship encourages space for trial and encourages learning through experience rather than mere coaching. Digital literacy and technological fluency are major competencies to the youth and they can find the way, assess, and generate digital content acquire powerful gear to the engagement and professional development. Financial literacy insists foundations for youth independence and community engagement and increase the economical growth. Service learning and volunteer initiatives connect young citizens directly the social needs while developing practical skills and promotion of the society. We are entering an era where nations face increasingly complex challenges in all angles through meaningful youth empowerment; nations secure their long-term prosperity and resilience. In the digital cum technical world youth are conscientious for the dynamic innovations, causative miscellaneous perspectives to promote their nation and advocating for impartial and sustainable advancement and responsibilities include acquiring digital literacy, engaging critically with technology, promoting inclusivity in tech, developing new skills for emerging fields, and using their fresh insights to solve global challenges through technological solutions.

Conclusion

The youth of India are the architects of its progress, with the potential to drive positive change and resolve challenges. Their enthusiasm, passion, and commitment to making a difference hold the promise of a brighter future for India, one where every citizen can thrive and contribute to the nation's growth and development. The youth holds immense significance as a pivotal part of a country's population. Their energy, ideas, and aspirations drive progress, innovation, and development. As future leaders, they shape the nation's trajectory, contributing to economic growth, social change, and a brighter future for the entire society.
