2- They filter their choices and narrow it down to the choices picked up by the customers and keep in mind the importance of transparency and the level of transparency their customers are looking for in order to gain their trust.

3- After they have chosen their suitable professionals, they let their customers chat with the professionals through

them to assure that they have chosen what they want and avoid misconceptions.

4- After having assured that their customer is satisfied and ready they promise their best to the customer.

. Related Work

Just on click is marked as one of the fastest-growing startups nationally as an online marketplace that helps connect service providers with service seekers. This is an end to your everyday problems. If you are searching for a beautician, a plumber, a mechanic, a yoga instructor, a lawyer, or a counselor, Just on Click is studded with hailing professionals in all..

Home services were previously one of those sectors that failed to witness many transformations. While services such as appliance, Yellow Pages, and Just Dial were common, professional services were not beneficial. These companies used to hire an aggregator who would transfer the job on to the professional individual, and doing so, a large part of the money would be spent to fill the aggregator 's pockets.

On the other hand, Just on click directly connects users with professionals who emerge to be the best of their kind. The team has had a lot of challenges but they're still paddling them all.

You may be interested to know what backed this start-up and how they drove it from scratch to sky-high. So, let's step in through the Just ON Click business model and unbox their path to success together.

What Does JUST ON CLICK Do?

Imagine that your AC unexpectedly stops working in the summer as the clock ticks at 10 p.m. Now that you feel hot that you need a person to fix your AC, you'll ask your relatives if they know someone who can fix them. Do all reject what to do next as his night? Now, if an agency comes into motion from where I will ask the individual and boom for AC repair! Now they're sending someone to fix and save you from hot summer nights. Okay, "JUSTONCLICK" does just that.

The business works closely with Service Providers for Individuals (ISPs) and turns them into micro-entrepreneurs. Just on click does so by offering market access, credit, insurance, training, inventory, acquisition, payment and a host of other services to ISPs. We give their job-seekers "leads." Through standardizing the end-user experience, pricing and distributing the service under the brand name of JustonClick, they drive their entire business.
