Abstract - In today's modern world, it becomes difficult to maintain/store case records for lawyers, The court cases for lawyers has been increased day by day. To make this easier we proposed a lawyer's dairy desktop application. With the help this application Lawyer can easily store case records on online mode. This application include complete case history like client, cases, case hearings, case dates, opposition party etc.Software controls day-to-day venture and builds an extensive client/case/matter database And history that can help enhance every aspect of your practice.

1. INTRODUCTION

Lawyers Diary is desktop based software for lawyers to maintain their daily case board management. It is a password protected dairy. Lawyers can store details of their clients. This software is simple and easy to use and its main goal is to reducing paper work. This software is developed to furnish better facility in desktop platform. This is the digital dairy which helps to keep information about Clients, Cases, Hearings, previous date, current date, next date, court name, whole case history and opposition etc. This Application is arise for Lawyers to make their work easier. Lawyer's dairy for lawyer's daily case dairy has got huge approval with its simple yet successful interface.

2. Body of Paper

Figure 1: Login Page

This is login page of application by using this we can enter in the application; here we provide a password which is sent on your email which you enter on the registration page.

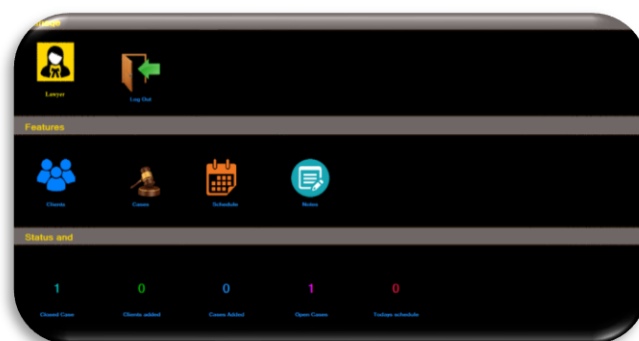

Fig 2.Home page

This is our application's home page, It has three divisions-

1] Manage: It consist of-

   ◆ **Info. Card-** This is the card provide the information of lawyer like his name, email, mobile no, qualification etc.

   ◆ **Logout-**By using logout option we can exit from this application.

2] Features: It includes-

   ◆ **Client-**Here we can add the details of clients like name, email, mobile no. etc.

   ◆ **Cases-**Here we can add all the details of case.

   ◆ **Schedule-**Lawyer can see his/her schedule.

   ◆ **Notes-**This feature is provided to store the important notes regarding to the case and also store the evidences.

3] Status and Overview:-It includes-

   ◆ **Closed cases-**Lawyer can see the cases which are currently closed.

   ◆ **Client added-**Lawyer can see the clients which are added.

   ◆ **Case added-**Lawyer can see the cases which are added.

   ◆ **Open case-**Lawyer can see the cases which are currently opened.

   ◆ **Schedule-**Lawyer can see his/her today's schedule.

METHODOLOGY

This is digitalized application. This system is totally connected to database. All cases and client details saved automatically in database. This system includes all case details and case histories.

First of all the register page will open then fill username and email After that we will click on login button, in that we will enter email and OTP will generated then user will successfully entered in this application. Then the home page will unlock. In that different types of options are available such as profile, features, status and overview .we can also add clients and their case records. also home page include log out button, with the help of logout option we can directly go outside from this application, but still all the records remain stored in database.

In this application we can enter only one user so this application can be safer for lawyers.

Features
1] All case related details of client are stored.
2] Access the case history and hearings.
3] Lawyer can easily find the case respectively.
4] No need to carry physical dairy.

RESULT AND DISCUSSION

This application is totally desktop based application. This application keep carry on clients and their case details or case histories. We can handled this application effortless or simply. Also lawyers can hold their proof/witness and records.

3. CONCLUSIONS

We have developed a safe, convenient case record management system which saves a lot of time of lawyer. The success of this project will make a enormous effect in the lawyers daily case management system. Lawyer can keep the details of case digitally so there is no need to carry documents or paper work all the time.
