Abstract –

Biospark-healthcare Private Limited is a Private incorporated on 05 July 2021. It is classified as Non-govt company and is registered at Registrar of Companies, Mumbai. Its authorized share capital is Rs. 150,000 and its paid up capital is Rs. 150,000. It is involved in Manufacture of other food products

Biospark-healthcare Private Limited's Annual General Meeting (AGM) was last held on N/A and as per records from Ministry of Corporate Affairs (MCA), its balance sheet was last filed on 31 March 2022.

Directors of Biospark-healthcare Private Limited are Jaiprakash Khanchand Vasdani, Neelkumar Rewachand Sujan, Vijay Jeevan Sujan and Prashant Kothari.

Biospark-healthcare Private Limited's Corporate Identification Number is (CIN) U24290MH2021PTC363325 and its registration number is 363325. Its Email address is vijay.sujan@jnvgroup.co and its registered address is 4-A, 4TH FLOOR, 898 NOTAN PLAZA TURNER ROAD, BANDRA (WEST) MUMBAI Mumbai City MH 400050 IN.

Current status of Biospark-healthcare Private Limited is - Active.

The initial project proposal outlined a simple system of using a concept called “networked hypertext” to transmit documents and to communicate among staff in the high-energy physics community.

Keywords – SUPPLY, SUPPLY CHAIN, SUPPLY CHAIN MANAGMENT, INDIRECT SUPPLY, TAX TRANSPORT COMPLIANCE, TRANSPORTATION

I. INTRODUCTION-

The World Wide Web (WWW), also known as the Web, is the most popular way to trawl through the information content of the Internet, the network of networks which has become part of everyday life for millions of people in all sectors of the community. The concept of the WWW began in March 1989 and was developed by Tim Berners-Lee of the European Particle Physics Laboratory (CERN). He proposed the project as an effective means of transporting research and ideas throughout the organization.

The initial project proposal outlined a simple system of using a concept called “networked hypertext” to transmit documents and to communicate among staff in the high-energy physics community. Hypertext is the organization of information into connected association.

INDUSTRY ANALYSIS-

Sell Side refers to the e-Commerce functionality that enables a company to actually make their goods and services available over the Internet. Critical to the success of the seller, it assists the seller in improving internal business processes and functionality. The purpose is to help companies increase revenue and profitability by reducing business and procurement costs.

SCOPE OF THE PROJECT-

The scopes of the project are as under:

-The benefit of study for the researcher is that it helped to gain knowledge and experience and also

MISSION OF THE COMPANY-

Santosh S Bakshetti tax consultancy & advisory services aim to: -to provide their best and reliable services exceeding their client's expectations,

- to respect the confidentiality of all their clients &
- to maintain long term relationships with their clients.

II. STATEMENT AND OBJECTIVES-

Prepare eight fold cone of what man filter paper.

Weigh accurately what man round filter paper note down as W1.

Add to the folded cone 2 to 3 gm of Moisture free material.

Fold the cone in such a manner that sample material does not spill out.

Close the upper end of the cone with ordinary paper and clip it tightly.

Now take the weight of sample plus filter paper and note as W2.

REPONSIBILITIES AND DESCRIPTION-

The arrival of the Internet and the World Wide Web (WWW) brought a new way of doing business and many of the success stories that capture the public attention are consumer- orientated. Examples are Amazon.com and Tesco's on-line ordering system.

Business-to-Consumer (B2C) systems are those where a consumer interacts directly with the supplier's system through their own computers. It is simply electronic retailing using the Web as a medium to place orders for typical consumer goods such as books, CDs and, increasingly, travel arrangements. SMEs can be involved in B2C eCommerce without actually selling goods, if the target audience for their services is end-consumers.

SMEs with much smaller budgets than Amazon and Tesco could typically use a third part electronic catalogue product, which would provide a mechanism for displaying items for sale and a secure mechanism for accepting orders and payments from customers. Although such systems would need integrating with other computer programs being run within a business, there are many examples of initial SME B2C systems being run as standalone systems.

CRITICAL OBSERVATIONS-

Tax consultancy is a firm where a tax consultant or a tax advisor is to help people and organizations in paying their taxes. They hold expertise in tax law, tax compliance, and tax planning. They help in making tax returns and work closely with their clients to minimize their tax liabilities throughout the year. The reason for my working under a tax

METHDOLOGY-

Research methodology is used for this project. It provides insights and comprehensions of the issue or situation. The initial phase of the project demanded exploratory research to capture, understand, interpret and apply the concepts and skills relating to basics of GST and return filing process of GST and technical implications.

METHODS-

Some advantages that **can** be achieved from e-commerce include Being able to conduct business 24 x 7
E-commerce systems can operate all day every day. Your physical storefront does not need to be open in

order for customers and suppliers to be doing business with you electronically. Access the global marketplace:

The Internet spans the world, and it is possible to do business with any business or person who is connected to the Internet. Simple local businesses such as specialist record stores are able to market and sell their offerings internationally using e-commerce. This global opportunity is assisted by the fact that, unlike traditional communications methods, users are not

III. SUPPLY CHAIN MANAGEMENT–

Keep your navigation as simple as practicable. It has been proved that the number of clicks that lead to a purchase on a site is directly proportional to the realization of the sale. This is good e-commerce design a customer will lose their patience if they have to click more than three times to complete a purchase.

Make sure to check that all the links on your e-commerce web site actually work. You need to do this regularly so you can find out when a link fails, another source of frustration for visitors.

Do name your links appropriately so that people can understand them and remember them too. For example, if you are selling furniture and the link is for armchairs, name the link armchairs.htm and not furniture05739.

government relating to the transactions made by the business during the period under consideration.

RECOMMENDATIONS AND SUGGESTIONS

An e-business solution should increase business efficiency—not create additional administrative burdens. A security solution should be easily managed, and remain so as it grows to support the organization's expanding e-business environment Expansion plans:

After observing the above problem, I also came across another recommendation. Because there are no permanent employees on whom the firm can also plan for further expansion.

IV. CONCLUSION-

E-business - Developer Security Requirement

Developers of corporate e-business systems place exacting requirements on the technology they use to build the e-business environment, and with good reason. These developers are under intense pressure to get systems up and running quickly, as well as to accommodate changing requirements. This means that the e-business security infrastructure must satisfy specific needs for speed of deployment, flexibility, scalability, and manageability.

Typically, developers of e-business systems are under tremendous pressure to get applications online quickly.
